Portfolio: [nguyen_hong_tham](#)

SUMMARY

Final-year Information Technology student with hands-on experience developing backend services using NestJS, Node.js, PostgreSQL and MySQL. Built multiple e-commerce and delivery platform projects involving RESTful APIs, authentication and authorization, payment integration and database-driven business workflows. Experienced in designing relational databases, implementing secure API endpoints and integrating third-party services. Seeking a Backend Developer Internship to contribute to scalable backend systems while strengthening software engineering expertise.

Experience

Backend Developer Intern | VNA Group

Tech: NestJS, TypeScript, PostgreSQL, Prisma, Supabase, JWT, Swagger, Nodemailer

- Developed and maintained RESTful APIs for user, enterprise, and reporting management modules.
- Implemented authentication, email-based password recovery, and role-based access control (RBAC).
- Built CRUD functionalities and backend business logic for enterprise management and reporting workflows.
- Worked with PostgreSQL and Prisma ORM to design and manage relational database operations.
- Developed Excel import, Word report generation, and email notification features.
- Collaborated with team members using Git and followed project coding standards.

PROJECTS

May Milk Tea E-commerce System

Tech: React, TypeScript, NestJS, PostgreSQL, Prisma, Socket.io, OpenAI, VNPAY

Github: [project_MAY](#)

- Developed customer and admin applications supporting milk tea ordering and management workflows.
- Built RESTful APIs for authentication, products, orders and payment processing.
- Implemented Firebase OTP, JWT authentication and role-based access control mechanisms.
- Integrated VNPAY payments, real-time order tracking and an AI-powered recommendation chatbot.

Vinabook

Tech: Next.js, React, TypeScript, PostgreSQL, JWT Authentication, React Query, AI Chatbot Integration

Github: github.com/nguyen-hong-tham/vina_book

- Developed backend services supporting authentication, product management and order workflows.
- Designed relational database models and implemented business logic for bookstore operations.
- Built RESTful APIs for user, product and order management functionalities.
- Implemented role-based administration features and integrated AI-powered services.

SKILL

Programming Languages: Java, C#, C++, Python, TypeScript, JavaScript

Frontend: React, Next.js, Tailwind CSS, Redux Toolkit, React Query

Backend: Node.js, NestJS, RESTful APIs, JWT Authentication, Firebase Authentication, WebSocket (Socket.io)

Database & ORM: PostgreSQL, MySQL, SQL Server, Prisma ORM, Entity Framework Core, LINQ

Core Concepts: Data Structures & Algorithms, OOP, SOLID Principles, Design Patterns, Database Design

Tools & DevOps: Git, GitHub, Docker, Jest, Swagger, GitHub Actions

AI: ChatGPT, Claude Code, Gemini, Codex, Speckit

EDUCATION

Sai Gon University

Faculty: Information Technology

Current GPA : 3.06/4

CERTIFICATIONS

TOEIC (in progress).

VSTEP (B1).
