

NGUYỄN HỒNG THẨM

Software Engineer Intern (Fullstack)

Phone: 0362989907

Email: nguyenhongtham27.09.2004@gmail.com

Github: github.com/nguyen-hong-tham

Portfolio: nguyen_hong_tham

SUMMARY

Final-year Information Technology student specializing in Fullstack Web Development with experience in React, Next.js, TypeScript, NestJS and PostgreSQL. Built e-commerce and food delivery platforms featuring authentication, payment integration and real-time functionality. Developed responsive user interfaces, designed RESTful APIs and implemented database-driven business workflows. Seeking a Fullstack Developer Internship to contribute to scalable web applications and strengthen software engineering expertise.

Experience

Backend Developer Intern | VNA Group

Tech: NestJS, TypeScript, PostgreSQL, Prisma, Supabase, JWT, Swagger, Nodemailer

- Developed and maintained RESTful APIs for user, enterprise, and reporting management modules.
- Implemented authentication, email-based password recovery, and role-based access control (RBAC).
- Built CRUD functionalities and backend business logic for enterprise management and reporting workflows.
- Worked with PostgreSQL and Prisma ORM to design and manage relational database operations.
- Developed Excel import, Word report generation, and email notification features.
- Collaborated with team members using Git and followed project coding standards.

PROJECTS

May Milk Tea E-commerce System

Tech: React 19, TypeScript, NestJS, PostgreSQL, Prisma, Socket.io, OpenAI, VNPay

Github: <https://github.com/nguyen-hong-tham/MAY>

- Developed customer and admin applications supporting milk tea ordering and management workflows.
- Built RESTful APIs for authentication, products, orders and payment processing.
- Implemented Firebase OTP, JWT authentication and role-based access control mechanisms.
- Integrated VNPay payments, real-time order tracking and an AI-powered recommendation chatbot.

Vinabook

Tech: Next.js, React, TypeScript, PostgreSQL, JWT Authentication, React Query, AI Chatbot Integration

Github: github.com/nguyen-hong-tham/vina_book

- Developed full-stack bookstore and administration modules using Next.js and TypeScript.
- Built reusable components, search, filtering and pagination for product discovery.
- Integrated RESTful APIs for authentication, product management and order workflows.
- Implemented AI chatbot features and optimized data fetching with React Query.

SKILL

Programming Languages: Java, C#, C++, Python, TypeScript, JavaScript

Frontend: React, Next.js, Tailwind CSS, Redux Toolkit, React Query

Backend: Node.js, NestJS, RESTful APIs, JWT Authentication, Firebase Authentication, WebSocket (Socket.io)

Database: PostgreSQL, MySQL, SQL Server, Prisma ORM

Core Concepts: Data Structures & Algorithms, OOP, Design Patterns, Database Design

Tools & DevOps: Git, GitHub, Docker, Jest, Swagger, GitHub Actions

AI: ChatGPT, Claude Code, Gemini, Codex, Speckit

EDUCATION

Sai Gon University

Faculty: Information Technology

Current GPA : 3.06/4

CERTIFICATIONS

TOEIC (in progress).

VSTEP (B1).
